

ADECO[®] FRIZANTIN[®] -40

Description:

ADECO[®] FRIZANTIN[®] -40, a coolant of blue colour, prepared for cooling systems of motor vehicles. It is produced on the basis of Monoethylene Glycol and a special additive package.

Purpose:

ADECO[®] FRIZANTIN[®] -40 is a liquid prepared for direct use in cooling systems of motor vehicles. Protects the motor from overheating in summer and freezing in winter. Does not freeze above the temperature of -40°C . Provides excellent protection against corrosion for metal parts of the cooling system of motor vehicles. It is designed to fully meet the highest requirements for additional protection of all aluminium engine parts from corrosion. It can be also used in other open and closed cooling systems. The recommended drain period is two years. It can be mixed with other coolants produced on the same basis.

Performance Benefits:

- Excellent protection against frost;
- Excellent resistance to corrosion, especially of aluminium alloys;
- Good thermal properties;
- Long-term protection;
- No foaming tendency.

Physical and Chemical Characteristics:

- Density at 20°C , g/cm^3 1.06 – 1.10
- pH value 8 - 9
- Colour blue

Meets the requirements of the following standards:

SRPS H.Z8.058, Type 3; BS 6580:1992 and AFNOR R15-601.

The quality is controlled by an accredited laboratory.

Packages:

12 x 1 lit., 60 lit. and 220 kg.
